

## STARCO GECKO

Innovating the Fork Lift Truck market

The latest development of STARCO's FLT Tyre range is based on the well-known and tested STARCO Unicorn solid tyre. Using the proven rubber compound that guarantees increased lifetime combined with the

technology used for unique patterns in heavy duty off road applications – STARCO has created a benchmark solid tyre for extreme conditions.

Named after a creature able to grip to any surface, STARCO Gecko will perform best when used in rough, muddy and difficult conditions outside of the warehouses and in production areas, where weather conditions result in challenging work surfaces.

- ▶ Specially designed open tread for uncompromising “Gecko” grip
- ▶ High self-cleaning capabilities
- ▶ Excellent performance on soft grounds, in muddy conditions, snow and sleet environment
- ▶ Using STARCO Unicorn’s flexible inner layer ensures a comfortable ride
- ▶ Improved stability with a specially designed solid tread centre line
- ▶ Optimal compound mix and increased usable tread depth for best lifetime in tough use
- ▶ STARCO designed, engineered and produced

## SOLID TYRE PRODUCTION

Unique technology with extreme production flexibility

- ▶ STARCO’s first production facility for solid tyres was established in Sri Lanka
- ▶ Special research and compound development ensures optimal quality
- ▶ STARCO guarantee based on efficient testing procedures
