

Takes your fleet further. And your performance, too.

Our **new Conti Hybrid HS5.**

German engineered high-mileage tyres.

- Benefit from very high mileage thanks to the new compound formula developed for regional operations.
- Enjoy strong grip in all weathers due to an extra-robust tread pattern including new full-width 3D matrix sipes (providing traction over the lifetime of the tyre).
- Its intelligent pattern design enables even wear while maintaining excellent grip.

Generation 5. Together we make difference.

Our new Conti Hybrid HS5.

German engineered high-mileage tyres.

Our marathon tyre for your marathon business.

Since running a business is a marathon and not a sprint, the brand-new Conti Hybrid HS5 steer axle tyre allows fleet vehicles to cover longer distances than ever before – especially when it comes to the requirements of regional operations. A new tread compound for the steer axle with an extra-high amount of natural rubber enables impressive robustness and a high tread integrity for an even wear and a high cut resistance over the whole lifetime of the tyre. Furthermore, an intelligent combination of two different compounds for cap and base enables a balanced-out ultra-high-mileage and good rolling resistance, resulting in fuel efficiency – which is more than just useful when you aim to make the most out of your business.

Nothing comes between you and safe driving.

Whatever the destination of your fleet vehicles, the Conti Hybrid HS5 steer axle tyre makes sure they never lose contact with the road along the way. Which means in detail that it provides outstandingly strong grip under all weather conditions – enabled by its extra-robust tread pattern including full-width 3D matrix sipes that ensure a top-level performance over the complete tyre lifetime – and just in case you already forgot: this means for a very, very long time.

Designed to stay in good shape for many miles.

No matter how much time your tyres will spend on the road, they won't let you notice it. To achieve an even wear performance without compromising on balanced-out grip, we worked out a very innovative surface design. In addition, a new 0° belt casing (only available for size 315/70 R 22.5) enables excellent pressure distribution in the road contact area under changing load conditions, which results in a significant mileage improvement and an even wear shape. And who doesn't appreciate a good performance that lasts?

Tyre Size	LI/SI				M+S	
315/70 R 22.5	156/150 L (154/150 M)	C	B	A/70 dB	●	●
385/55 R 22.5	160/000 K (158/000 L)	C	B	B/73 dB	●	●
