

POSITION: TRAILER

GHT50

M+S

Recommended Application
Long Haul Service / Regional Haul Service

- **GS I-FEAT Technology**

Ensures high efficient tyre contour with high durability and even tread wear

- **Asymmetric Tread Groove**

Asymmetrical grooves at tread and bottom provide excellent drainage performance and stone eject performance

- **Dural Tread Radius**

Makes even ground contacting area, improves the wear resistance

- **Optimized Carcass Line Profile**

Positions the most suitable deflection zone, reduces sidewall heat generation, improved handling performance and driving comfort
